

## The “Puzzle of Biodiv“

The „Puzzle of Biodiv“ consists of 16 glass-components connected by links. The foot is suspended on steel cables which are fixed on a solid steel construction. Supervised by a Bavarian glass artist, the participants designed the components individually for their countries by using the fusing technology.

Size of the footprint:

Length: 2.5 metres  
Height: 1.2 metres  
Weight: app. 80 kg

The exhibition could consist of the following elements:

- The “Puzzle of Biodiv” (see above), including an explanatory board
- 1 Roll-up concerning the Youth Summit (in German)
- 1 Roll-up with the final [Declaration](#) (in English)
- 1 Roll-up with information about the Wilderness Camp in the Bavarian Forest National Park (in German)
- The photo Exhibition “Unity in diversity: my environment and me” (16 Photos A1, weather-proof)
- The [Photo Brochure](#) concerning the Exhibition
